

Is
qChange
Available in
Microsoft
Teams?

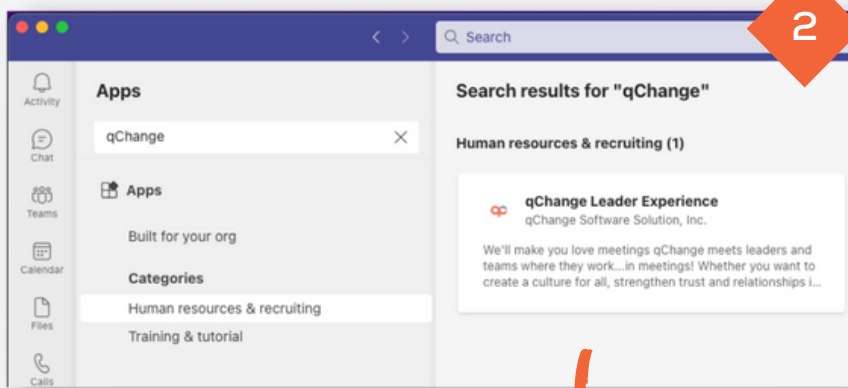

Checking if qChange Leadership Experience Solution available in Microsoft Teams

qChange makes developing your soft skills easy by being inside Microsoft Teams. However, sometimes organizations want to stop the widespread adoption of new products. So we created an easy step-by-step process for you to check qChange's availability in your organisation.

1. Click "Apps" at the bottom left of the Teams toolbar

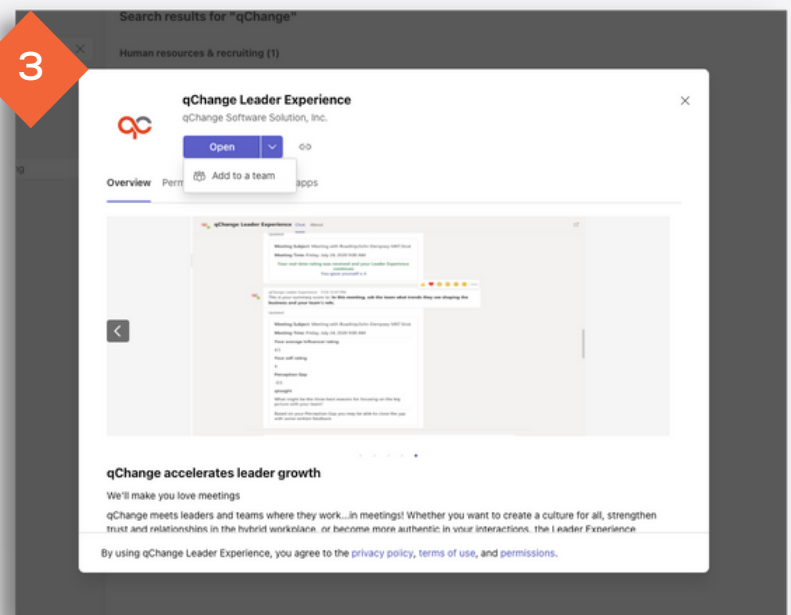

2. Type "qChange" in the search bar and select qChange Leadership Experience

3. Select install.

Do not add the bot to a team. This was made default by Microsoft.

If you receive a message saying 'Contact I.T.' or 'Contact your Administrator' our solution is not available in your environment. It takes I.T. less than 5 minutes to install, so please reach out.
